BlockEstate Real Estate Tokenization Engine

App Blueprint & UX Wireframe Documentation

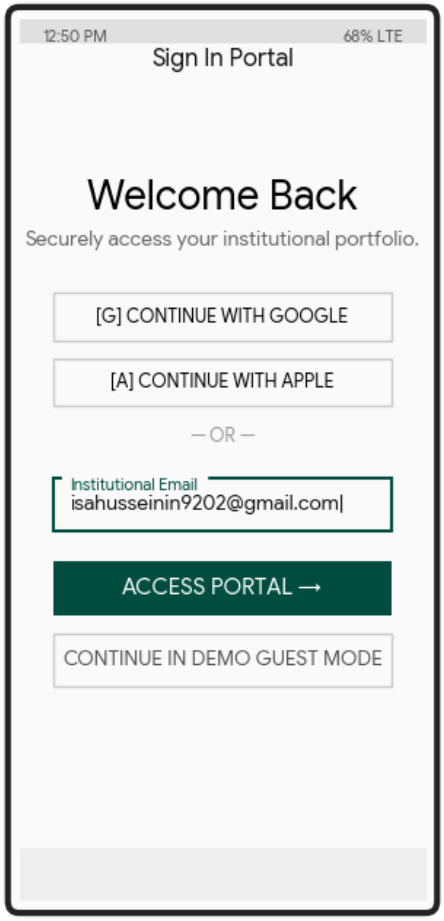

1. Launch & Splash Screen (Onboarding)

UX Objective:
Displays high-level value propositions detailing direct micro-investments in East African commercial property starting at KES 3,250.

Key Technical Architecture Components:
• ERC-3643 Permissioned Smart Contract Addresses
• Celo / Polygon Layer-2 Rail Telemetry Infrastructure
• Automated M-Pesa Native Mobile Ledger Interoperation
• Official Regulatory Compliance Framework Reporting Structure (CMA Kenya Sandboxed)

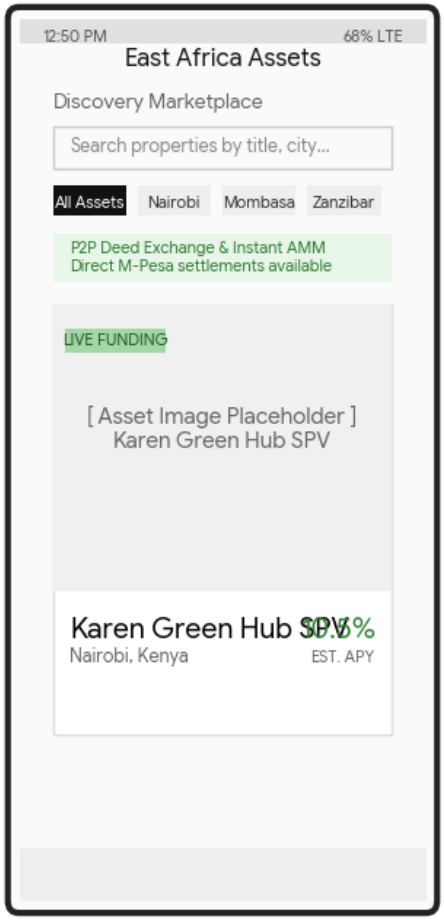

2. Regulatory Onboarding & Login Portal

UX Objective:
Institutional secure email authentication gateway. Features deep integration links to CMA Tier-1 Accredited status verification hooks.

Key Technical Architecture Components:
• ERC-3643 Permissioned Smart Contract Addresses
• Celo / Polygon Layer-2 Rail Telemetry Infrastructure
• Automated M-Pesa Native Mobile Ledger Interoperation
• Official Regulatory Compliance Framework Reporting Structure (CMA Kenya Sandboxed)

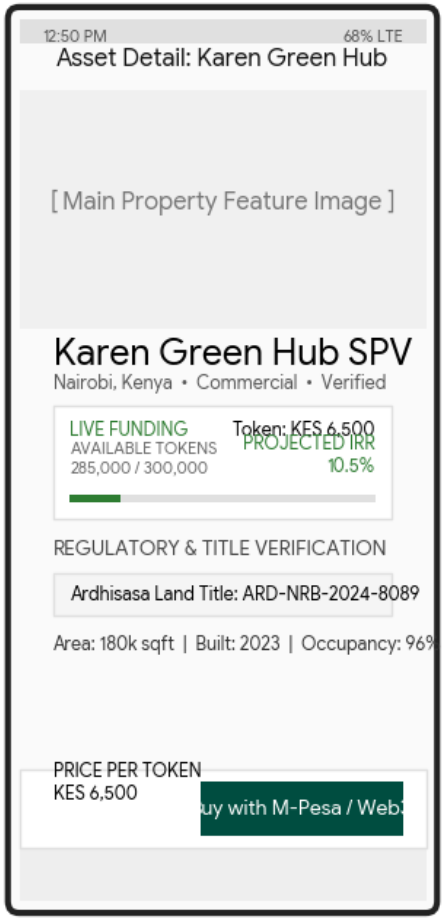

3. Discovery Marketplace Hub

UX Objective:
A layout displaying fractional real estate pools (SPVs) organized by jurisdictional filters (Nairobi, Mombasa, Zanzibar).

Key Technical Architecture Components:
• ERC-3643 Permissioned Smart Contract Addresses
• Celo / Polygon Layer-2 Rail Telemetry Infrastructure
• Automated M-Pesa Native Mobile Ledger Interoperation
• Official Regulatory Compliance Framework Reporting Structure (CMA Kenya Sandboxed)

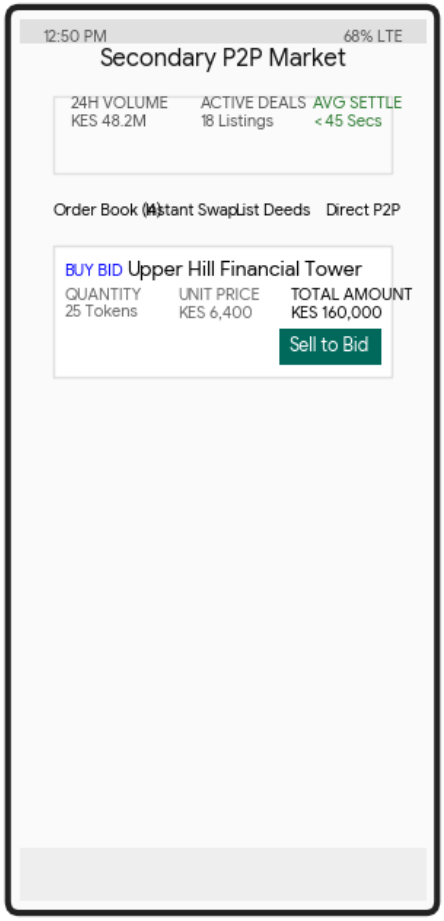

4. Asset Fractionalized Registry Detail

UX Objective:
Deep-dive view of tokenized assets displaying physical area coverage, real-time occupancy metrics (96%), and authoritative title registry links directly mapped via Ardhisasa.

Key Technical Architecture Components:
• ERC-3643 Permissioned Smart Contract Addresses
• Celo / Polygon Layer-2 Rail Telemetry Infrastructure
• Automated M-Pesa Native Mobile Ledger Interoperation
• Official Regulatory Compliance Framework Reporting Structure (CMA Kenya Sandboxed)

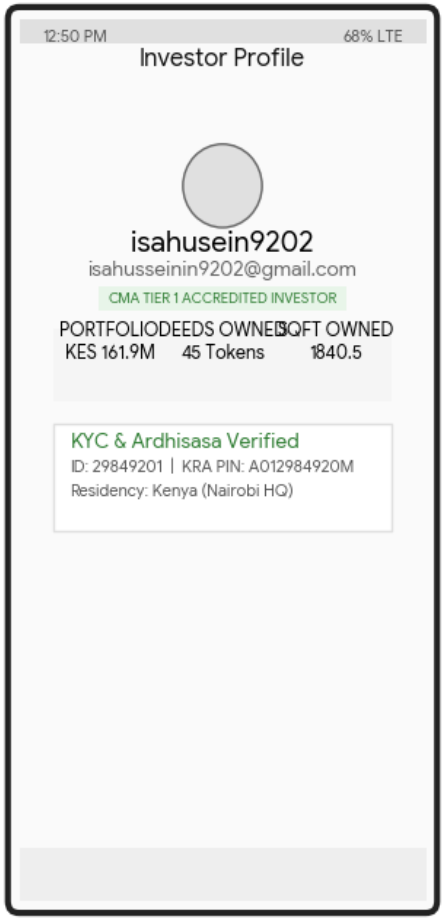

5. Secondary P2P Order-Book Exchange

UX Objective:
An internal peer-to-peer liquidity floor for instantaneous transfer of smart-deed token instruments.

Key Technical Architecture Components:
• ERC-3643 Permissioned Smart Contract Addresses
• Celo / Polygon Layer-2 Rail Telemetry Infrastructure
• Automated M-Pesa Native Mobile Ledger Interoperation
• Official Regulatory Compliance Framework Reporting Structure (CMA Kenya Sandboxed)

6. Accredited Investor Core Profile

UX Objective:
Centralized user summary ledger showing accumulated financial positions, verified national identity documents, and linked Web3 balances.

Key Technical Architecture Components:
• ERC-3643 Permissioned Smart Contract Addresses
• Celo / Polygon Layer-2 Rail Telemetry Infrastructure
• Automated M-Pesa Native Mobile Ledger Interoperation
• Official Regulatory Compliance Framework Reporting Structure (CMA Kenya Sandboxed)
